PROTECT YOUR VEHICLE AND TIRE INVESTMENT

Benefits of replacing worn or weak shocks/struts

- Faster stopping (safer vehicle)
- Longer tire life (reduced operating cost)
- Improved handling, performance and control (improved vehicle safety)
- Longer life of other suspension parts (ball joints, springs, c.v. joints, etc.)
- More comfortable ride (less bounce and sway)

Why make Gabriel your next brand of shocks & struts?

- Warranty and service
- Nitrogen gas charged* for increased performance and control
- Spring loaded, triple edge rod seal for greater durability, resulting in longer shock and strut life
- Electro-statically applied paint to resist rust
- Computer designed valving for customized performance

The 3 P's (Reasons to replace shocks & struts)

1. **Physical**
   - Leaking fluid
   - Dented or damaged housing
   - Broken or worn mounts or bushings
   - Pitted or dented piston rod
   - Uneven tire wear (abnormally worn or cupped tire tread)

2. **Performance**
   - Vehicle may be taking longer to stop
   - Vehicle sways or leans on turns
   - Vehicle nosedives when braking
   - Vehicle bounces after hitting a road bump
   - Vehicle ride is harsh, bumpy or shakes

3. **Preventive**
   - Protect new tires for longer wear
   - Protect vehicle alignment for stable control
   - Protect other costly suspension parts
   - Maximize braking performance

Additional facts to consider:

- Shocks and struts deteriorate slowly, so you may not notice ride control deterioration.
- Shocks and struts move a <u>minimum</u> of 10 million times every 20,000 miles, working hard to protect you and your vehicle.
- Weak shocks and struts allow increased ride height changes while vehicle is moving. This additional movement increases the wear on other suspension components, which can cause premature component failure. In many cases, these components are more expensive to replace than the shocks and struts.
- Weak shocks and struts allow tire hop, reducing vehicle control**.**
- Shocks and struts that have deteriorated permit an increase in tire tread distortion and vehicle weight shift, reducing vehicle performance and stopping ability.
- As shocks and struts become worn and lose resistance, your vehicle can take longer to stop. Depending on vehicle and road conditions, this additional stopping distance can vary. Longer stopping distances benefit no one.
- Shocks and struts are the only devices on your vehicle designed to reduce vehicle up and down movement. This reduction in movement, offers many benefits including a safer more reliable vehicle.

Feb. 2002

LES TRAINS ROULANTS ET LES PNEUS DE VOTRE VÉHICULE MÉRITENT LA MEILLEURE PROTECTION

Voici quelques avantages apportés par le remplacement d'amortisseurs ou de jambes de force usés ou affaiblis

- Distances de freinage plus courtes (sécurité accrue)
- Les pneus durent plus longtemps (réduction des frais d'entretien)
- Amélioration de la tenue de route, des performances et de la maniabilité (comportement plus sain du véhicule)
- Augmentation de la durée de vie des autres éléments de suspension (rotules, ressorts, cardans, etc.)
- Amélioration du confort (mouvements de caisse et roulis réduits)

Pourquoi équiper votre véhicule d'amortisseurs et de jambes de force de marque Gabriel?

- Pour la garantie et le service
- Pour leur conception. Les amortisseurs à gaz* ont un rendement et un contrôle optimisés
- Pour leur joint d'étanchéité de tige à 3 lèvres assisté par un ressort. Ce joint forme un ensemble plus résistant, et augmente la durée de vie de l'amortisseur et de sa tige
- Pour la peinture électrostatique qui résiste mieux à la corrosion
- Pour le tarage réalisé par ordinateur, qui offre un rendement « sur mesure »

Voici les trois règles, ou 3 P, qui déterminent le remplacement des amortisseurs ou jambes de force de votre véhicule

1. **Physique**
   - Fuites d'huile
   - Corps de l'amortisseur bosselé ou endommagé
   - Supports ou douilles cassés ou endommagés
   - Tige de piston rongée ou entaillée
   - Usure inégale des pneus (usure anormale ou en facettes)

2. **Performance**
   - Les distances de freinage peuvent être allongées
   - Tendance au roulis et inclinaison de la caisse en virage
   - Plongée au freinage
   - Oscillation exagérée de la caisse lorsque le véhicule franchit une bosse
   - La portée du véhicule est dure, et peut s'accompagner de soubresauts et de vibrations

3. **Prévention**
   - Évite l'usure prématurée des pneus
   - Conserve les réglages des trains roulants pour une meilleure tenue de cap
   - Évite l'usure prématurée des éléments de suspension coûteux
   - Optimise le freinage

Autres facteurs importants :

- Les **amortisseurs et jambes de force se détériorent lentement** et, à cet effet, la dégradation de conduite pourrait passer inaperçue.
- Les amortisseurs et jambes de force se déplacent un minimum de **10 millions** de fois tous les 30 000 km (20 000 mi). Ils effectuent un travail ardu afin d'assurer votre sécurité et de protéger les éléments de votre véhicule.
- Des amortisseurs et jambes de force usés laissent la hauteur du véhicule augmenter lorsqu'il roule. Cette course additionnelle des éléments de suspension **augmente le facteur d'usure** et peut provoquer une défaillance prématurée. Généralement, ces éléments sont plus onéreux à remplacer que les amortisseurs et jambes de force.
- Des amortisseurs et jambes de force usés favorisent le rebondissement des pneus et **réduisent la maîtrise du véhicule**.
- Des amortisseurs et jambes de force usés augmentent la déformation de la semelle du pneu et le transfert de masse du véhicule, ce qui **affecte le comportement et les performances de freinage du véhicule**.
- Lorsque les amortisseurs et jambes de force s'usent et perdent peu à peu de leur résistance, **la distance de freinage de votre véhicule augmente proportionnellement**. Selon les caractéristiques de votre véhicule et l'état de la route, l'augmentation de votre distance de freinage peut varier. Des distances de freinage plus longues n'apportent aucun bénéfice.
- Les amortisseurs et jambes de force de votre véhicule sont les seuls éléments qui limitent l'effet d'oscillation de la caisse. Cette limitation de mouvement apporte de nombreux avantages et augmente votre sécurité.

* S'applique à tous les produits haut de gamme, incluant la majorité des produits de base.

Use The Right Parts, For The Right Job

90-95 CHRYSLER Town & Country Front
86-95 DODGE Caravan Front
86-95 PLYMOUTH Voyager Front

G55525 Ultra Gas Strut

Although this illustration refers to the G55525, proper component installation is very important for all shocks and struts. The G55525 stack up illustration shows all the components needed to correctly install the strut. Failure to use all the parts described in the instructions could result in excessive noise, decreased ride performance and / or premature failure of the strut or strut mount.
Please consult the application section for coverage details.

Strut mount & bearing. Included in super kit number 142933.

Upper and lower retaining washers. Included in number 142933.

Upper spring seat, notch in upper spring seat must be aligned with strut clevis bracket. Included in number 142940.

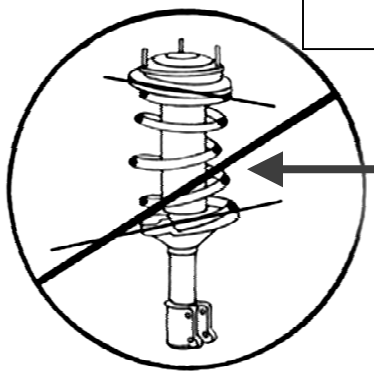
Upper spring seat isolator, this part is often not used causing noise and premature failure of the upper spring seat. Included in number 142940.

Jounce bumper and dust boot. Included in number 142933.

It is important to make sure the upper and lower spring seat are correctly aligned. Failure to align the spring seat will put a bow in the coil spring decreasing ride performance and service life of the strut.

Coil Spring

Lower spring seat isolator, this part is also often not used causing metal-to-metal contact noise and a harsh ride. Number 142568.



Coil Spring Bow

Utilisez les bonnes pièces au bon endroit

CHRYSLER Town & Country 1990-1995 - avant
DODGE Caravan 1986-1995 - avant
PLYMOUTH Voyager 1986-1995 - avant

Jambe de force G55525 Ultra Gas

Il est très important d'installer correctement les composants des amortisseurs et des jambes de force. L'illustration ci-contre se rapporte à la pièce G55525 et présente tous les composants nécessaires pour assurer l'installation adéquate de cette jambe de force. Toute omission d'installer une pièce décrite dans les directives peut entraîner un bruit excessif, un roulement déficient et/ou une défaillance prématurée de l'amortisseur ou de la jambe de force. Veuillez vous référer à la section sur les applications pour plus de détails relatifs à la couverture.

Roulement et support de jambe de force. Compris dans l'ensemble numéro 142933.

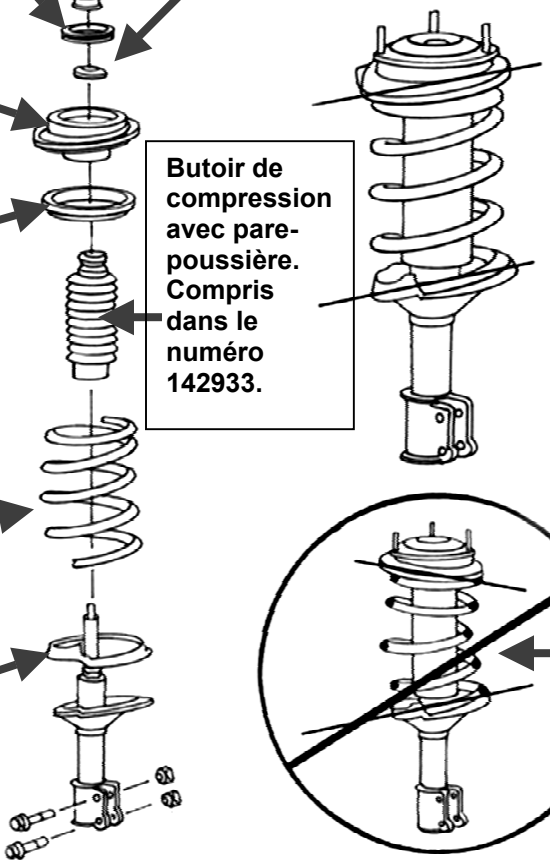
Rondelles de retenue supérieure et inférieure. Comprises dans le numéro 142933.

L'encoche du siège de ressort supérieur doit être alignée avec le support à chape de la jambe de force. Compris dans le numéro 142940.

Isolateur du siège de ressort supérieur. Le défaut d'installer cette pièce peut provoquer du bruit et la défaillance prématurée du siège de ressort supérieur. Compris dans le numéro 142940.

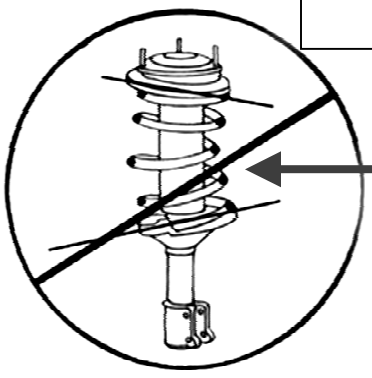
Butoir de compression avec pare-poussière. Compris dans le numéro 142933.

Il est important que les sièges de ressort supérieur et inférieur soient correctement alignés. Le défaut d'aligner ces pièces peut occasionner une cambrure du ressort hélicoïdal, réduisant la qualité de roulement et la durée de vie de la jambe de force.



Ressort hélicoïdal

Isolateur du siège de ressort inférieur. Le défaut d'installer cette pièce peut entraîner un bruit de friction métal sur métal et un roulement dur. Numéro 142568.



Cambrure du ressort hélicoïdal

SOMMAIRE DES NOTES EN BAS DE PAGE

2) Pour les véhicules GM dotés d'un système de correction d'assiette installé en usine, voir la section Référence A.

5) Avec suspension à autocorrecteur d'assiette Nivomat. Remplace le ressort numéro 1359710 ou 1273977 des modèles Volvo.

8) Convient aussi comme pièce de rechange habituelle pour les systèmes de suspension Nivomat.

9) Si le ressort de suspension entre en contact avec l'unité, faire pivoter le ressort de 180 degrés.

10) Un léger meulage de l'ouverture du bras de suspension est nécessaire pour installer tout produit fabriqué avant août 1988.

12) Utiliser la trousse numéro 140719 pour remplacer le matériel de fixation d'origine du support de montage inférieur de l'amortisseur quand le goujon est brisé ou que les vis autotaraudeuses ne sont plus utilisables.

14) Nécessite l'outil spécial d'installation de jamba de force nº 100915. Voir la référence E pour connaître les directives à cet effet.

17) Blue Ryder Extra Heavy Duty Shock

30) Au moment de remplacer les amortisseurs avant d'un véhicule doté d'amortisseurs aux quatre roues, il est recommandé d'utiliser quatre amortisseurs de la même série.

31) Il est recommandé d'utiliser la trousse à soufflet numéro 141242 pour protéger la tige de piston des débris de la route.

35) Amortisseur avec siège de ressort. Produit ne contenant pas de gaz.

39) Les jambes de forces doivent être installées par paire.

40) Avec suspension à autocorrecteur d'assiette Nivomat. Remplace le ressort numéro 1229052/4 des modèles Volvo.

43) Une jambe de force habituelle avec gaz sous pression peut-être utilisée pour remplacer une jambe de force pneumatique réglable avec gaz sous pression d'origine. Toutefois, le système à autocorrecteur d'assiette doit être désactivé. Voir les directives à la section Référence A.

47) Un patin pour siège de ressort est compris dans la trousse 142446.

51) Le coussinet de jambe de force à utiliser avec les jambes de force/cartouches/amortisseurs indiqués ci-dessus.

59) Amortisseur arrière avec ressort conçu pour installation à l'avant.

60) Ce véhicule est doté de quatre amortisseurs arrière.

61) Barre de stabilisation de la direction. Le support de montage n'est pas requis. L'installation se fait au niveau des supports de jambes de force d'origine. Voir la section Référence C pour obtenir des illustrations et des protecteurs facultatifs pour barre de stabilisation.

62) nouveaux numéros de pièces , la disponibilité va être annoncée bientôt

64) ready mount strut : unite completement assembler

66) Barre de stabilisation de la direction. Pour système double. Une trousse comprenant deux barres de stabilisation et un support doit être commandée. Voir la section Référence C pour obtenir des illustrations et une trousse de protecteurs facultatifs pour barre de stabilisation.

67) embalee en paire

68) Barre de stabilisation de la direction. Utiliser avec la trousse présentée. Voir la section Référence C pour obtenir des illustrations et des protecteurs facultatifs pour barre de stabilisation.

76) Article de commande spéciale -- Les unités peuvent être à gaz sous pression ou non.

85) Max Control

86) La trousse comprend le support et le palier.

87) La trousse de montage comprend un support, un siège de ressort, un palier et un isolateur.

88) La trousse de montage comprend un support, un butoir/un soufflet et des arrêtoirs.

91) La trousse de montage comprend un siège de ressort inférieur avec un palier intérieur et un isolateur.

CHEVROLET and GMC TRUCK IDENTIFICATION

USE FOR: C & R Series 2 Wheel Drive Pickup and Suburban 1987-89
K & V Series 4 Wheel Drive Pickup and Suburban 1987-89

Chassis and body style changes made by General Motors to their truck line can sometimes cause identification problems for a consumer or salesperson on these vehicles. You can very quickly determine the correct application information by using the Vehicle Identification Number (VIN). This, in turn, will allow you to select the correct shock absorber part number.

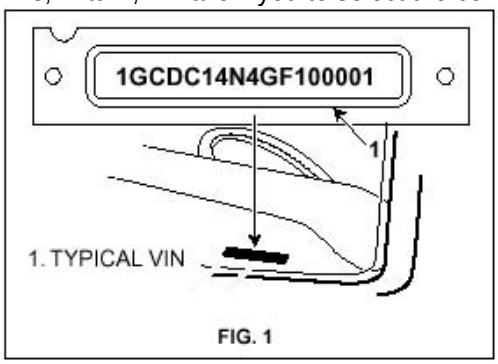

FIG. 1

How do I find the VIN?
On all models except forward Control, it is located on a plate which is attached to the left top of the instrument panel and can be seen through the windshield from the outside of the vehicle (See *Figure 1*). On Forward Control Models, the plate is on the dash and toe panel.

How do I read the VIN Number?
Starting from the left of Vin Number go to the fifth digit. The fifth digit tells you the line and chassis type, the sixth digit is the series and the seventh digit is the body type. For specific identification use Figure 2.

VEHICLE IDENTIFICATION NUMBER (VIN)

2 G C D C 1 4 K X K 1 1 3 2 1 6 1

Line and Chassis Type

Code	Line	Chassis Type
C	Conventional Cab	4 x 2
R	Conventional Cab	4 x 2
D	Military Truck	4 x 4
K	Conventional Cab	4 x 4
V	Conventional Cab	4 x 4
G	Van	4 x 2
P	Forward Control	4 x 2
S	Sm Conventional Cab	4 x 2
T	Sm Conventional Cab	4 x 4
M	Sm Van	4 x 2

Code	Series
1	½ Ton
2	¾ Ton
3	1 Ton

Code	Body Type
0	Chassis Only
1	Hi Cube/Cutaway Van
2	Forward Control
3	Four-Door Cab
4	Two-Door Cab
5	Van
6	Surburban
7	Motor Home Chassis
8	Utility (Blazer/Jimmy)
9	Extended Cab

If you have any questions please call *The Tech Line at* ***1-800-999-3903.***

Identification de camions Chevrolet et GMC

Utilisation : camionnettes et Suburban séries C & R à 2 roues motrices 1987-89
Camionnette et Suburban séries K & V à 4 roues motrices 1987-89

En raison des changements effectués par General Motors au châssis et à la carrosserie de leurs marques de camions, il peut parfois être difficile pour le client ou le vendeur d'identifier ces camions. Il est très facile de déterminer l'information pertinente à l'application à l'aide du numéro d'identification du véhicule (NIV). Vous pourrez ainsi déterminer le bon numéro de pièce d'amortisseur.

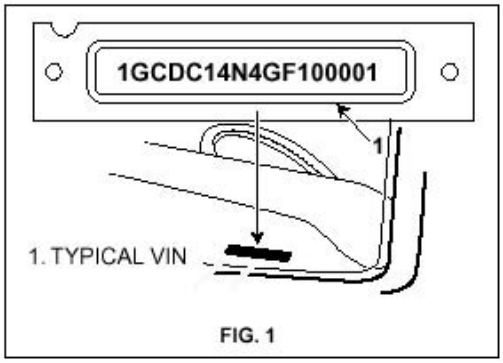

FIG. 1

Comment trouver le NIV?

Pour tous les modèles, sauf pour les véhicules à conduite avancée, le NIV se trouve sur une plaquette fixée sur la partie supérieure gauche du tableau de bord et il est visible de l'extérieur du véhicule par le pare-brise (voir Figure 1). Pour les modèles à conduite avancée, la plaquette se trouve sur la tôle de fixation du tableau de bord.

Comment lire le NIV?

À partir de la gauche, allez au cinquième caractère. Le cinquième caractère indique la marque et le type de châssis, le sixième caractère désigne la série et le septième, le type de la carrosserie. Pour l'identification spécifique, utilisez la Figure 2.

VEHICLE IDENTIFICATION NUMBER (VIN)

2 G C D C 1 4 K X K 1 1 3 2 1 6 1

Line and Chassis Type

Code	Line	Chassis Type
C	Conventional Cab	4 x 2

{Pour Des Apostilles Voir La Page 11}

2 For GM vehicles equipped with factory installed leveling systems, see Reference A.
30 It is recommended that, when replacing front shocks on vehicles with "quad shocks" option, all four shocks should match by series.
31 Bellows Kit No. 141242 is recommended for use to protect piston rod from potentially harmful road debris.
61 Steering Stabilizer. Mounting bracket not required, install on O.E. shock mounts. See Reference E for illustration and optional Steering Stabilizer Boots.
67 Pair Packs
68 Steering Stabilizer. Use Kit if listed. See Reference E for illustration and optional steering stabilizer boots.

30 It is recommended that, when replacing front shocks on vehicles with "quad shocks" option, all four shocks should match by series.
31 Bellows Kit No. 141242 is recommended for use to protect piston rod from potentially harmful road debris.
61 Steering Stabilizer. Mounting bracket not required, install on O.E. shock mounts. See Reference E for illustration and optional Steering Stabilizer Boots.
67 Pair Packs
68 Steering Stabilizer. Use Kit if listed. See Reference E for illustration and optional steering stabilizer boots.

{Pour Des Apostilles Voir La Page 11}

8 Also works as conventional type replacement for Nivomat Suspension.
9 If suspension spring contacts this unit, rotate suspension spring 180 degrees.
10 Slight grinding of control arm opening is required to install product made before August, 1988.
30 It is recommended that, when replacing front shocks on vehicles with "quad shocks" option, all four shocks should match by series.
51 Strut Cushion for use with the Strut/Cartridge/Shock listed directly above.
64 ReadyMount Strut, "Complete Assembled Unit"
67 Pair Packs
68 Steering Stabilizer. Use Kit if listed. See Reference E for illustration and optional steering stabilizer boots.
70 Component parts replaced by Suspension Mount Kit
86 Kit with Mount and Bearing.

{Pour Des Apostilles Voir La Page 11}

30 It is recommended that, when replacing front shocks on vehicles with "quad shocks" option, all four shocks should match by series.

31 Bellows Kit No. 141242 is recommended for use to protect piston rod from potentially harmful road debris.

61 Steering Stabilizer. Mounting bracket not required, install on O.E. shock mounts. See Reference E for illustration and optional Steering Stabilizer Boots.

67 Pair Packs

68 Steering Stabilizer. Use Kit if listed. See Reference E for illustration and optional steering stabilizer boots.

AIR ADJUSTABLE HOSE KITS

Hose kit 141099 is packaged with all Air Adjustable Shocks listed in this catalog. For those vehicles equipped with G.M. Self-Leveling Systems, it may be necessary to purchase adapter kit 141248. Hose kit 140656 with separate fill valves can be installed on vehicles to allow Air Adjustable Shocks to be filled individually.

REPLACEMENT AIR FITTINGS KITS

Each kit packaged in individual plastic bags.

KIT PART NUMBER	CONTENTS OF KIT	
140701 Replacement Air Fill Valve.	1 Tee Valve 1 Cap 1 Metal Washer	1 Rubber Washer 2 Nuts 1 Air Pressure Warning Circle
140721 Necessary hardware to accomplish one complete installation; excluding hose assemblies.	1 Brass Fill Valve 1 Cap 1 Metal Washer	1 Rubber Washer 1 Nut 1 Air Pressure Warning Circle
141122 Replacement Hose and fittings.	2 Tube Nuts 2 Tube Clamps 6 'O' rings	1 Tube 3 Tubing Clips

G.M. SELF-LEVELING SYSTEM / HOSE KIT CROSS REFERENCE

General Motors vehicles equipped with factory installed G.M. Self-Leveling Systems require an adapter hose kit to operate with our Air Adjustable. See chart below for the correct application for your vehicle. Use of conventional shock absorbers on these applications would require deactivation of the air compressor.

APPLICATION	AIR ADJUSTABLE NO.	HOSE KIT(S) REQUIRED
1979-85 Buick Riviera	49345	141099 or 141248*
1979-85 Cadillac Eldorado	49345	141099 or 141248*
1980-85 Cadillac Seville	49345	141099 or 141248*
1979-85 Oldsmobile Toronado	49345	141099 or 141248*
G.M. vehicles with electrically operated self-leveling system or vacuum operated self-leveling system (except above listings)	Listed with vehicle	141099 and 141248**

* 141099 and 141248 are packaged with the Air Adjustable shocks. Shown for reference if replacement is required.

** 141099 is packaged with the Air Adjustable shocks. 141248 must be purchased separately and used with hose kit packaged with shocks.

No. 141099 Kit Contains:

4 - Tube Nuts
4 - Tube Clamps
10 - Packing 'O' Rings
1 - Tube
1 - Tee Block Air Valve Fitting
1 - Valve Core
6 - Tubing Clips
1 - Valve Cap
1 - Washer
2 - Hex Nuts
1 - Seal
1 - Warning Tag
1 - Instruction Sheet

No. 141248* Kit Contains:**

3 - Tube Nuts
3 - Tube Clamps
8 - Packing 'O' Rings
2 - Tubing Clips
1 - Valve stem adapter & seal sub-assy
1 - Valve stem adapter
1 - Self-tapping screw
1 - Coupling (brass)
1 - Compression Spring
1 - Valve core
1 - Tee clip
1 - Valve cap
1 - Instruction sheet

*** Used in conjunction with Hose Kit # 141099.

ENSEMBLES DE BOYAUX POUR HI JACKER

Un ensemble de boyaux **141099** doit être commandé avec chaque paire de Hi Jacker listé dans ce catalogue. L'ensemble d'adaptateurs **141248** est également requis pour les véhicules GM équipé d'un "Self Leveling System".

ENSEMBLES DE QUINCAILLERIE DE REMPLACEMENT POUR SYST ME DE COMPRESSION

Chaque ensemble est emballé individuellement dans des sachets plastiques.

NUMÉRO DE PIÈCE	CONTENU DE L'ENSEMBLE	
140701 Soupape de remplissage d'air de remplacement.	1 Valve en "T" 1 Capuchon 1 Rondelle de métal	1 Rondelle de métal 2 Écrous 1 Anneau indicateur de
140721 Quincaillerie nécessaire pour une installation complète, boyaux non inclus.	1 Écrou 1 Capuchon 1 Rondelle de métal	1 Valve de remplissage cuivre 1 Rondelle de caoutchouc 1 Anneau indicateur de
141122 Boyaux et raccords de remplacement.	1 Tuyau 3 Brides de tuyau 6 Joints toriques	2 Colliers de serrage pour tuyau 2 Écrous pour tuyau

LISTE DE RENVOIS POUR ENSEMBLES DE BOYAUX "SELF LEVELING SYSTEM" DE GM

Les véhicules General Motors équipé d'un "Self Leveling System" installé en usine requièrent un ensemble d'adaptateurs de boyaux pour fonctionner avec notre système Hi Jacker. Consultez le tableau ci-dessous pour l'application appropriée à votre véhicule. Pour utiliser des amortisseurs conventionnels avec ces applications, on doit désactiver le compresseur d'air.

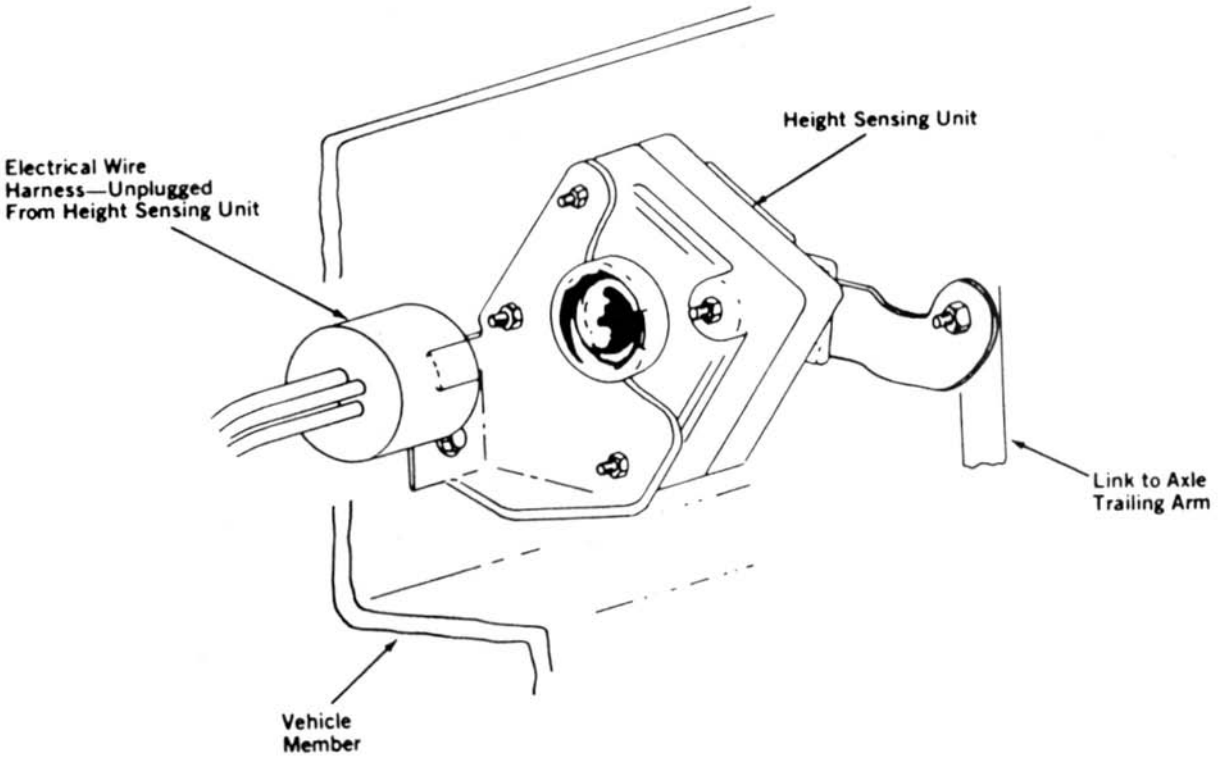
APPLICATION	AIR ADJUSTABLE NO.	HOSE KIT(S) REQUIRED
1979-85 Buick Riviera	49345	141099 or 141248*
1979-85 Cadillac Eldorado	49345	141099 or 141248*
1980-85 Cadillac Seville	49345	141099 or 141248*
1979-85 Oldsmobile Toronado	49345	141099 or 141248*

141099:
- 4 - Écrous pour tuyau
- 4 - Colliers de serrage pour tuyau
- 10 – Joints toriques
- 1 - Tuyau
- 1 - Raccord de soupape en "T"
- 1 - Noyau de valve
- 6 - Brides pour tuyau
- 1 - Capuchon de soupape
- 1 - Rondelle
- 2 - Écrous à hexagonaux
- 1 - Joint d'étanchéité
- 1 - Étiquette de prévention
- 1 - Feuille d'instructions

141248*:
- 3 – Écrous pour tuyau
- 3 – Colliers de serrage pour tuyau
- 8 – Joints toriques
- 2 – Brides de tuyau
- 1 – Sous-assemblage d'adaptateurs de corps de valve et de joint d'étanchéité
- 1 – Adaptateur de corps de valve
- 1 – Vis à tôle autotaraudeuse
- 1 – Raccord en cuivre
- 1 – Ressort de compression
- 1 – Obus de valve
- 1 – Bride en "T"
- 1 – Bouchon de valve
- 1 – Feuille d'instructions

* Utiliser conjointement avec l'ensemble de boyaux no. 141099.

SELF LEVELING SYSTEM ELECTRONIC COMPRESSOR DEACTIVATION PROCEDURE FOR GM MODELS



When installing conventional struts/shock absorbers on GM models equipped with self leveling rear suspension that uses an electronic compressor the following procedure should be used:

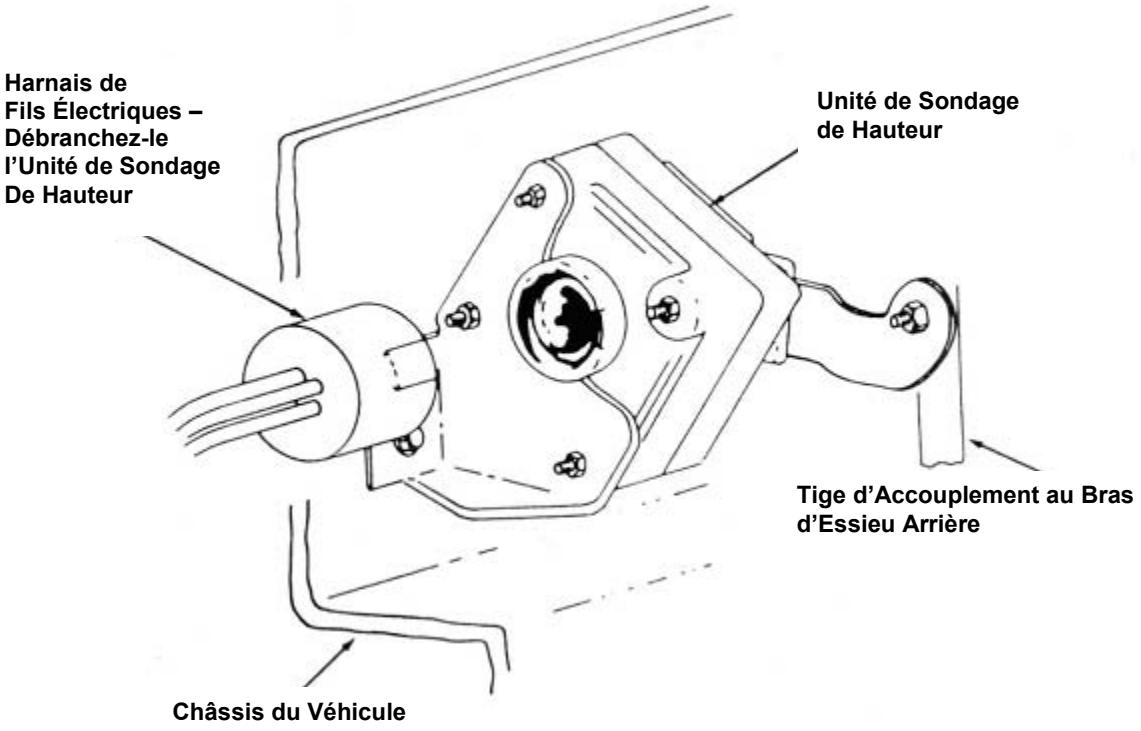
1. Locate height sensing unit on under body of vehicle approximately above the independent suspension/rear axle. Locate a small link connected to the independent suspension control arm/rear axle trailing arm. The upper end of this link will be connected to the electronic height sensing unit.

2. Unplug electrical wire harness from the height sensing unit. System is now deactivated.

3. Cover exposed electrical connector with tape or other suitable material and secure to underside of vehicle.

4. It is Not necessary to disconnect link to suspension control/axle trailing arm.

PROCÉDÉ DE DÉACTIVATION DU COMPRESSEUR ÉLECTRONIQUE DU SYSTÈME DE NIVELAGE DES MODÈLES GM



Lors de l'installation d'amortisseurs conventionnels sur les modèles GM doté d'une suspension arrière auto-niveleuse utilisant un compresseur électronique, le procédé suivant doit être utilisé:

1. Retrouvez l'unité de sondage de hauteur sous le chassis du véhicule environ au-dessus de l'essieu arrière. Retrouvez la petite tige d'accouplement au bras d'essieu arrière. Le bout supéricur de cette tige sera raccordé à l'unité électronique de sondage de hauteur.

2. Débranchez le harnais de fils électriques de l'unité de sondage de hauteur. Le système est maintenant désactivé.

3. Recouvrez le raccord électrique exposé avec du ruban ou tout autre matériau convenable et fixez-le sous le véhicule.

4. Il N'EST PAS nécessaire de désaccoupler la tige d'accouplement du bras d'essieu arrière.

WHAT IS A STRUT MOUNT?

Strut Mount™ is the part that affixes the strut to the body of the car. It usually consists of steel plates separated from each other by a rubber polymer. The strut is connected to one of the steel plates. The bearing is used for those suspension systems that use the strut for steering by providing a smooth response. Strut Mount™ plays a VITAL role in vehicle handling, ride control, alignment, braking and steering. When worn or damaged, the Strut Mount™ will adversely effect the vehicle's handling characteristics.

WHAT FUNCTION DOES STRUT MOUNT™ PERFORM?

- Provides a connection between the strut and car body.
- Acts as a "shock – absorber" above and beyond the action of the strut, to further eliminate unwanted suspension travel.
- It is an alignment item that can be used to adjust both the caster and camber of the wheel.
- Acts as a pivot point for the steering mechanism, by providing a smooth steering response by way of a bearing usually located within the mount.
- Assists in keeping the vehicle on a straight and level path under hard braking.
- Aids in eliminating body sway when cornering.

HOW DO I KNOW WHEN THE STRUT MOUNT™ NEEDS REPLACEMENT?

The need for replacement depends on the type of travel, driving characteristics and the vehicle. A good guideline is that if the struts are worn out, the mounts will be also. A worn mount will have one or more of the following characteristics:

- Clunking noises when driving under normal conditions
- Steering stiffness – binding (worn bearing)
- Poor steering return
- Roll or sway in turns
- Vehicle bounces or slides sideways on a winding rough road
- Abnormal rear end "squat" when accelerating
- Abnormal front dive when braking
- Poor alignment - the top is worn to the point that the car cannot be aligned to O.E. specification

QU'EST-CE QU'UN SUPPORT DE JAMBE DE SUSPENSION?

Le support de jambe de suspension est la pièce qui relie la jambe à la carrosserie. Il se compose normalement de lames d'acier isolées l'une de l'autre par un polymère de caoutchouc. La jambe est fixée à l'une de ces lames d'acier. Un palier est installé sur les systèmes dont la jambe de suspension est utilisée pour la direction afin d'offrir un roulement en douceur. Le support de jambe de force joue un rôle ESSENTIEL dans la tenue de route, l'amortissement, le parallélisme des roues, le freinage et la direction. Si le support de jambe de suspension est usé ou endommagé, toutes les caractéristiques de la tenue de route sont altérées.

QUELLES SONT LES FONCTIONS DU SUPPORT DE JAMBE DE SUSPENSION?

- ·Il sert de lien entre la jambe de suspension et la carrosserie.
- ·Il agit comme amortisseur au-dessus et au-dessous de la jambe et sert à éliminer l'excès de jeu qui peut se créer dans la suspension.
- ·Il constitue un élément du parallélisme des roues utilisé pour le réglage de la chasse et du carrossage de la roue.
- ·Il agit comme point de pivotement pour la direction et lui permet ainsi de se faire en douceur par le biais d'un palier qui se trouve habituellement à l'intérieur du support.
- ·Il contribue à maintenir le véhicule en ligne droite lors d'un freinage brusque.
- ·Il contribue à empêcher le roulis.

COMMENT SAVOIR SI LE SUPPORT DE JAMBE DE SUSPENSION DOIT ÊTRE REMPLACÉ?

Le remplacement dépend du type de course, des caractéristiques de conduite et du véhicule. En principe, si les jambes de force sont usées, les supports le sont également. Un support usé montre un ou plusieurs des signes suivants :

- ·Des bruits sourds dans des conditions de conduite normales
- ·Rigidité de la direction (paliers usés)
- ·La direction se rétablit mal
- ·Roulis ou balancement dans les virages
- ·Le véhicule a tendance à balancer ou à se déporter sur les routes sinueuses et irrégulières
- ·Cabré anormal du train arrière lors de l'accélération
- ·Réaction anormale du train avant lors du freinage
- ·Parallélisme des roues déficient - la partie supérieure est usée au point où le parallélisme ne peut plus être réglé selon les normes d'origine du constructeur

VISUAL INDICATIONS OF A WORN MOUNT:

- Cracked and/or sagging rubber
- Corrosion
- Deformed or bent parts
- Loss of grease from the sealed bearing assembly
- Signs of wear due to rubbing

WHAT HAPPENS WHEN MOUNTS ARE WORN?

Worn suspension mounts can decrease the life of:

- Ball Joints
- CV Joints
- Springs
- Struts
- Steering Linkage
- Tires

HOW TO SELL STRUT MOUNT™ REPLACEMENT:

- Educate the customer on the purpose of mounts and how to determine their wear.
- Explain the importance of Strut Mount™ to the customer.
- Explain to the customer how the replacement Strut Mount™ will return his or her vehicles to the proper OEM specifications.
- With the new Strut Mount™ installed, the customer's vehicle will be safer and easier to drive

WHY IS THE GABRIEL STRUT MOUNT™ PROGRAM THE BEST IN TODAY'S MARKET?

- Best all around vehicle coverage.
- Highest quality parts in the aftermarket.
- All strut mounts meet or exceed OEM/OES requirements.
  - *Only OEM/OES approved bearings are used.*
  - *The rubber to steel bonding is superior.*
  - *Excellent rubber rebound and durability.*
  - *Complete installation hardware kits are included with the mounts.*
  - *Specific installation instructions are included with each mount.*

SIGNES VISUELS DE l'USURE D'UN SUPPORT :

- Caoutchouc fendu ou détendu.
- Corrosion
- Éléments déformés ou courbés
- Fuite de graisse au niveau du palier étanche
- Signes d'usure due à la friction

QUE SE PASSE-T-IL LORSQUE LES SUPPORTS SONT USÉS?

Des supports de suspension usés diminuent la durée de vie utile :

- des rotules
- des joints homocinétiques
- des ressorts
- des jambes de suspension
- de la timonerie de direction
- des pneus

COMMENT VENDRE DES SUPPORTS DE JAMBE DE SUSPENSION DE RECHANGE :

- Expliquez au client le rôle des supports et la façon d'en déterminer l'usure.
- Expliquez l'importance du support de jambe de suspension au client.
- Expliquez au client qu'avec le support de jambe de suspension de rechange, son véhicule correspondra aux normes exactes de l'équipementier.
- Une fois le nouveau support de jambe de suspension installé, le véhicule du client sera plus sécuritaire et plus facile à conduire.

POURQUOI LE PROGRAMME DE FIXATIONS INFÉRIEURES DE JAMBES DE SUSPENSION GABRIEL EST-IL ACTUELLEMENT LE MEILLEUR DU MARCHÉ?

- Il couvre une plus grande gamme de véhicules.
- Il offre une meilleure qualité de pièces sur le marché des accessoires et pièces de rechange.
- Toutes les fixations inférieures de jambes de suspension correspondent ou sont supérieures aux normes des équipementiers.
  - *Seuls des paliers d'origine approuvés par les équipementiers sont utilisés.*
  - *Qualité supérieure du raccord caoutchouc-métal.*
  - *Excellente élasticité et durabilité du caoutchouc.*
  - *Trousses de matériel d'installation complètes incluses avec les supports.*
  - *Instructions d'installation détaillées incluses avec chaque support.*

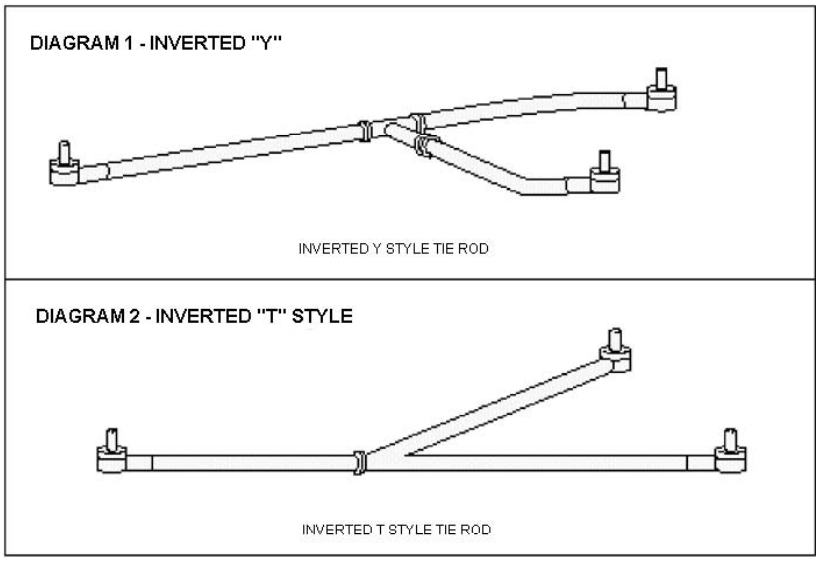
For the following applications, if tie rod assembly is Diagram 1 – Inverted “Y” – it must be changed to Diagram 2 late model 1978-79 Inverted “T” style (see below illustrations). On some Fords, Inverted “T” cannot be installed and no dual stabilizer can be installed.

1978-79 Ford Bronco (without Sway bar)
1970-79 Ford 4 W.D. F-100, F-150 (without Sway bar)



Trucks with ram style power steering cannot be converted to Inverted “T”

ELECTRONIC ADJUSTABLE SUSPENSION CONVERSION

Some vehicles equipped with Electronically Adjustable Suspension can have a non-adjustable strut / shock replacement. The following is a list of those vehicles and the procedures for replacement.

BUICK PARK AVENUE 1993-96 with CCR (Computer Command Ride)
- Remove the strut actuators
- Remove the CCR. It is located under the driver's seat.
  - Reference GM Document VSS20000025
- Remove struts and install G56718 Front and one of the following Rears:
  - G56707, G56726, G56903, G56906

BUICK SKYLARK 1992-94 with CCR (Computer Command Ride)
- Remove the shock and strut actuators
- Remove the CCR. It is located behind the sound insulator panel, right side.
  - Reference GM Document VSS20000025
- Remove the shocks and struts and install G56719, G56720 front and 69749 rear.

CADILLAC DEVILLE 1991-93 with CCR (Computer Command Ride)
- Remove the strut actuators
  - Reference GM Document VSS20000025 and GM Service Manual for system adjustment.
- Remove struts and install G56718 front and one of the following rears:
  - G56707, G56726, G56903, G56906

CADILLAC ELDORADO 1991-92 with CCR (Computer Command Ride) or SSS (Speed Sensitive Suspension)
- Remove the strut actuators
  - Reference GM Document VSS20000025 and GM Service Manual for system adjustment.
- Remove struts and install G56717 front and G56704 rear.

CADILLAC SEVILLE 1991-92 with CCR (Computer Command Ride) or SSS (Speed Sensitive Suspension)
- Remove the strut actuators
  - Reference GM Document VSS20000025 and GM Service Manual for system adjustment.
- Remove struts and install G56717 front and G56704 rear.

CHEVROLET CORVETTE 1990-96 with ERC (Electronic Ride Control)
- Remove the shock actuators.
- Unplug the ERC module. It is located in the rear cargo area.
- Remove the shocks and install 69811 or 75811 front and 69795 or 75795 rear.

FORD PROBE 1989-92 with PRC (Programmed Ride Control)
- Remove the strut actuators.
- Unplug the PRC module. It is located under the front passenger seat.
- Remove the struts and install G55600 front and G55601 rear.

FORD THUNDERBIRD TURBO COUPE 1987-88 with PRC (Programmed Ride Control)
- Remove the strut and shock actuators.
- Unplug the PRC module. It is located in the rear cargo area.
- Remove the struts and shocks and install G56504 front and 69709 rear.

MAZDA MX6 GT 1988-92 with AAS (Auto Adjust Suspension)
- Remove the strut actuators.
- Unplug the AAS module. It is located in the rear cargo area.
- Remove the struts and install G55600 front and G55601 rear.

MAZDA RX7 TURBO 1989-90 and MAZDA RX7 GXL 1986-88 with AAS (Auto Adjust Suspension)
- Remove the strut and shock actuators.
- Unplug the AAS module. It is located in the rear cargo area.
- Remove the struts and install G55542 front and G51031 rear.

MAZDA 626 1988-92 with AAS (Auto Adjust Suspension)
- Remove the strut actuators.
- Unplug the AAS module. It is located in the rear cargo area.
- Remove the struts and install G55600 front and G55601 rear.

ELECTRONIC ADJUSTABLE SUSPENSION CONVERSION

MAZDA 929 1988-89 with AAS (Auto Adjust Suspension)
- Remove the strut and shock actuators.
- Unplug the AAS module. It is located in the rear cargo area.
- Remove the struts and install G55713 front and G51192 rear.

MAZDA 929 1990-91 with AAS (Auto Adjust Suspension)
- Remove the strut and shock actuators.
- Unplug the AAS module. It is located in the rear cargo area.
- Remove the struts and install G55716 front and G51192 rear.

MERCURY COUGAR XR7 1987-88 with PRC (Programmed Ride Control)
- Remove the strut and shock actuators.
- Unplug the PRC module. It is located in the rear cargo area.
- Remove the struts and shocks and install G56504 front and 69709 rear.

MITSUBISHI MONTERO 1992-96 with VSA (Variable Shock Absorbers)
- Remove the shock actuators.
- Unplug the module. It is located behind the left rear trim panel.
- Remove the shocks and install G63782 or 77782 front and G63781 or 77781 rear.

NISSAN MAXIMA 1989-94 with NSS (Nissan Sonar Suspension) II
- Remove the strut actuators.
- Unplug the NSS module. It is located in the console.
- Remove the struts and install G55607, G55608 front and G44990 rear.

NISSAN PATHFINDER 1987-95 with ASA (Adjustable Shock Absorber)
- Remove the shock actuators.
- Unplug the control switch. It is located in the console.
- Remove the shocks and install G63904 or 77904 front and G63492 or 77492 rear.

OLDSMOBILE ACHIEVA 1992-94 with CCR (Computer Command Ride)
- Remove the shocks and strut actuators
- Remove the CCR. It is located behind the sound insulator panel, right side.
  - (Reference GM Document VSS20000025
- Remove the shocks and struts and install G56719, G56720 front and 69749 rear.

OLDSMOBILE NINETY EIGHT 1991-96 with CCR (Computer Command Ride)
- Remove the strut actuators.
- Remove the CCR. It is located under the driver's seat.
- Remove struts and install G56718 front and one of the following rears:
  G56707, G56726, G56903, G56906

PONTIAC BONNEVILLE 1994-99 with CCR (Computer Command Ride)
- Remove the strut actuators.
- Remove the CCR. It is located under the driver's seat.
- Remove struts and install G56718 front and one of the following rears:
  G56707, G56726, G56903, G56906

TOYOTA SUPRA from MARCH 1986-95 with TEMS (Toyota Electronic Modulated Systems)
- Remove the shock actuators.
- Unplug the TEMS module. It is located under the dash.
- Remove the shocks and install G51197 front and G51193 rear.

EXPLANATION OF COLUMN HEADINGS

Part Number: The catalog number for the individual shock absorber.
Extended Length*: The length of the shock absorber when it is fully extended. See "How to Measure" instructions.
Collapsed Length: The length of the shock absorber when it is fully collapsed. See "How to Measure" instructions.
Stroke: This is the approximate length of the stroke of the individual shock absorber being described.
Mounting Codes: Indicates the type of mounting ends for the upper and lower end of each shock absorber. They are Listed as follows:
- Stud type mounts ("S" & "DS")
- Eye ring and bushing mounts ("EB")
- Eye ring and bushing with sleeve mounts ("ES")
- Eye ring and bushing with bar pin mounts ("BP")
- Special mounting codes ("SP")

Dust Tube: Indicates whether the shock absorber is supplied with a dust tube.

***NOTE: ALL DIMENSIONS SHOWN ARE IN INCHES – SEE CONVERSION CHARTS BELOW.**

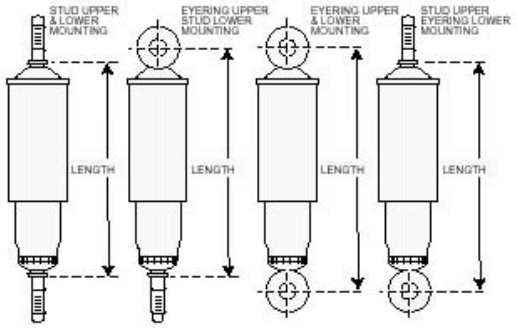
HOW TO MEASURE EXTENDED & COLLAPSED LENGTHS OF SHOCK ABSORBERS

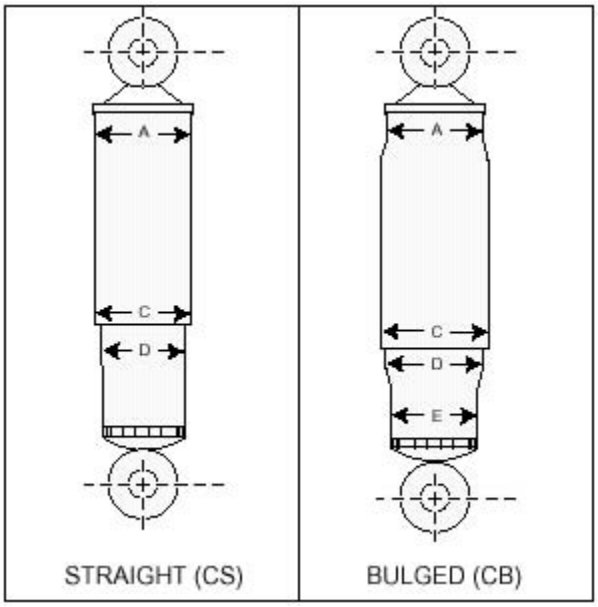


Instructions:

1. Using the proper measuring points as shown above find the nearest replacement shock absorber from the listing increments of extended length.
2. Identify the proper mounting form the mounting codes and match these requirements by carefully measuring the mounting dimensions (top and bottom) of the shock absorber to be replaced.
3. Carefully take note of the following requirements:
   a. Mounting Accessories-Contents and descriptions of parts are shown in this manual.
   b. Dust tubes-This requirement should be noted in comparison with the shock absorber to be replaced. Shock absorber environment in its application makes this requirement necessary for piston rod protection and extended shock absorber life.
   c. Recoil Cutoff and Compression Bumper-Carefully note these specifications-deviation of length requirements should not exceed ±½". These shock absorber designs are footnoted for easy identification.
   d. Limited Environment Application-Most conventional shock absorbers are offered in "straight" construction to fit limited environment applications. These shock absorber designs are footnoted.

SHOCK ABSORBER DIAMETERS

Shown below are measuring points for diameters by type of shock absorber. Refer to the chart below which lists diameters for the various bore sizes available for each type.



BORE SIZE	SHOCK ABSORBERS	TYPE (Shown Above)	Diameters				
			A	B	C	D	E
1 3/16"	Classic, Guardian, Ultra Pass. Car	CS	2.06	NA	2.00	1.63	NA

a - recoil cutoff construction
b - Compression bumper construction - collapsed length shown at bumper contact
c - Slim design for limited environment application

PL - Plastic Dust Tube
NR - Not Required

DISPOSAL OF OLD OR DEFECTIVE GAS-PRESSURIZED SHOCKS & STRUTS

STORAGE OF USED SHOCK ABSORBERS AND STRUTS

Used struts and shocks should be stored so that any oil leakage will be properly collected. Those containers used to store this product should be labeled “USED OIL”.

Used struts and shocks can either be punctured to recycle the shock oil or disposed of in a manner consistent with local or state programs.

RECYCLING OF SHOCK AND STRUT OIL

1. FOR YOUR SAFETY, ALWAYS WEAR SAFETY GLASSES AND PROTECTIVE GLOVES WHEN PUNCTURING STRUTS AND SHOCKS.

2. Securely mount the strut or shock in a vice in the horizontal position. Make sure that the piston rod is fully extended prior to drilling the unit (Fig.#1).

3. Using a 1/16” or 1/8” drill bit, drill a hole in a downward direction approximately 1.0” from the bottom of the strut or shock (Fig #2). It is important to cover the area where the hole is being drilled with a towel or some type of shield to prevent spraying gas and oil upon initial penetration of the drill bit.

4. After the gas pressure is released continue drilling into the inner cylinder of the strut or shock unit, approximately ½” deep. Drill a second ½” hole near the top of the unit.

5. Remove the strut or shock from the vice and hold it over a container to collect the used oil. Hand stroke the unit to completely purge the oil from the cylinder of the unit (Fig #3).

6. Collect all used oil, **being careful not to mix this oil with any other waste or refuse.** Store in DOT approved containers labeled “USED OIL”.

7. Dispose of the remaining strut or shock body and internal parts in accordance with local or state regulations (e.g., scrap metal recycler).

8. Store, dispose, and/or transport used oil in accordance with EPA regulations and your state’s used oil program.

DISPOSITION DE VIEUX OU DÉFECTUEUX CHOCS ET DE CONTREFICHES DE GAS-PRESSURIZED

STOCKAGE DES AMORTISSEURS ET DES CONTREFICHES UTILISÉS

Des contrefiches utilisées et les chocs devraient être stockés de sorte que n'importe quelle fuite d'huile soit correctement rassemblée.
Ces récipients stockaient ce produit devraient être marqués "HUILE USÉE".

Des contrefiches utilisées et les chocs peuvent se crever pour réutiliser l'huile de choc ou en quelque sorte le conformé débarassé aux programmes de gens du pays ou d'état.

RÉUTILISATION DU CHOC ET DE L'HUILE DE CONTREFICHE

1. POUR VOTRE SÛRETÉ, TOUJOURS VERRES DE SÛRETÉ D'USAGE ET GANTS PROTECTEURS EN CREVANT DES CONTREFICHES ET DES CHOCS.

2. Montez solidement la contrefiche ou la choquez dans un vice en position horizontale. Assurez-vous que la tige de piston est entièrement prolongée avant de forer l'unité (fig.# 1).

3. Emploi d'un morceau de foret de 1/16"ou de 1/8", forez un trou dans un sens de haut en bas approximativement 1.0"du fond de la contrefiche ou le choquez (figue # 2). Il est important de couvrir le domaine où le trou est foré avec un essuie-main ou un certain type d'écran protecteur pour empêcher pulvériser le gas et le pétrole sur la pénétration initiale du morceau de foret.

4. Après que la pression de gaz soit libérée continuent de forer dans le cylindre intérieur de la contrefiche ou choquez l'unité, approximativement ½ "profondément. Trou forez deuxième ½ "près du dessus de l'unité.

5. Enlevez la contrefiche ou la choquez du vice et tenez-l'au-dessus d'un récipient pour rassembler la huile usée. Course de main l'unité pour purger complet l'huile du cylindre de l'unité (figue # 3).

6. Rassemblez toute la huile usée, faisant attention à ne pas mélanger cette huile à tout autre erte ou à ne pas refuser. Le magasin dans le POINT a reconnu des récipients marqués "HUILE USÉE".

7. Débarassez-vous de la contrefiche restante ou choquez le corps et les pièces internes selon les règlements de gens du pays ou d'état (e.g., recycleur en métal de chute).

8. Magasin, disposez, etou le transport a employé l'huile selon des règlements d'EPA et le programme de la huile usée de votre état.
